

ONLINE TRAINING

Our KROENERT training is an important factor for your employees as well as for production and the quality of your products. Due to COVID-19 the training cannot take place this year.

For continuing our service to you, we are happy to announce our first online training session:

“Vacuum roller – function, service and maintenance”

KROENERT experts from engineering, service and process technology will explain the structure and the mechanism of the machine components and the entire machine. As well as the theoretical basis, the participants will get valuable tips and tricks, which will shape their daily work with the systems in an even more efficient manner.

Training course content:

- Process technology
- Operation and handling
- Maintenance and servicing

Target group:

Process technicians, maintenance staff, shift supervisors, heads of production and manufacturing

Your benefits:

- Comfortable participation from your workplace or home office (alone or in a team)
- No travel expenses and no additional time expenditure
- Manuscript for download as a PDF file
- No software download is necessary

Technical requirements for online training:

- Stable internet connection (DSL)
- Current browser (Google Chrome or Mozilla Firefox, Internet Explorer)
- Loudspeaker (optional headphones / headset)
- No software installation is necessary.

Date and Duration (60 min)

28 May 8 am CET
and 3.30 pm CET

Training language:

English

Location:

Web / Internet
