

Service Assignment Maintenance and Inspection

**Service assignment – receive quick help from the specialists.
Save time, costs and nerves thanks to KROENERT know-how.**

Be it electrics, mechanics, software, processes or construction – our technicians are ready to meet every challenge with a great deal of practical experience and know-how. Make use of the benefits of KROENERT customer service and use the resulting time and cost savings to your advantage.

In addition to the repair itself, our on-site service also includes qualified consulting regarding further measures on how to operate the system in a future-proof manner. As part of this work, there is also a regular transfer of knowledge between our service technicians and your machine operators.

Good to know: We keep your KROENERT system up to date – and you can keep manufacturing within your optimum operating window.

Your benefits:

- Repairs carried out by our specialists
- Optimisation of machine parameters
- Qualified fault analysis
- Our technicians provide you with tips and tricks

✓ **Repairs by the specialists**

✓ **Time and cost benefits**

✓ **Qualified consulting**

**Maintenance and inspection – ensuring friction-free processes.
Play it safe. With approved quality.**

Profit from professional maintenance and inspection by our experienced service technicians. Preventively detecting signs of wear and technical defects helps avoid costly repairs, protects against avoidable downtimes and ensures long-term value retention of the system. This service is carried out in accordance with KROENERT specifications, by trained specialists using special testing equipment and is thus the ideal way of ensuring trouble-free operation of your system.

Detailed service report.

You will receive a detailed maintenance report as a summary of the work carried out. This contains a checklist for your documentation as well as information regarding further measures, info about discontinued spare parts and recommendations for safety-relevant components.

Your benefits:

- Professional maintenance & inspection
- Qualified fault analysis
- Immediate repair if spare parts are available
- Up-to-date information on technology & spare parts
- The inspection results are documented in detail
- Concrete recommendations for further action
- Training & support for your employees
- Ideally combined with a service contract

✓ **Avoid downtime**

✓ **Systematic control**

✓ **Detailed service report**
