

Top quality spare-and-wear-parts.

The low-cost alternative to buying new parts.

Does your KROENERT system require spare-and-wear-parts? With original KROENERT components and high-quality spare parts from our suppliers, you can significantly extend the service life of your system.

KROENERT has an extensive stock of replacement components to react quickly to your needs and requirements.

Our service staff and the digital spare parts catalog (Catalog Creator – also retrofittable) will be pleased to help you select and identify the spare-and-wear-parts you need, and also to support you with quotations and order processing. In order to carry out targeted spare parts stocking, we create recommendation lists. Please feel free to contact us.

Your benefits:

- High availability directly from stock
- Fast delivery worldwide
- Recommendations for successor parts
- Selection and ordering of spare parts via digital spare parts catalog

✓ **Short downtimes**

✓ **Quality control**

✓ **Order service**

Repairs – reliable and economical.

We coordinate every step with you.

We support you professionally and quickly in reconditioning and repairing your KROENERT components. The repairs are carried out either at the KROENERT factory in Hamburg or at a supplier we know and trust.

For some of the components installed by KROENERT, repairs can be carried out simply and inexpensively. For example, damaged rollers can be sent to KROENERT to be examined by our specialists.

By involving the original suppliers, the the original delivery of the component can be restored in most cases.

Your benefits:

- Inspection and root cause analysis for damaged components
- Economic evaluation
- Involvement of the original supplier
- Simple handling

✓ **Original components**

✓ **Fault analyses**

✓ **Simple handling**
