

## Remote Service

Far away and yet right on site – our remote service.  
**Increase machine availability through fast remote maintenance.**

The demands on the productivity of your machinery keep on increasing. Unplanned downtimes cost money and nerves. In the event of a malfunction, KROENERT supports your maintenance staff on site with a great deal of experience and plant-specific know-how.

Our experts know every system down to the smallest screw and are able to quickly localise fault causes.

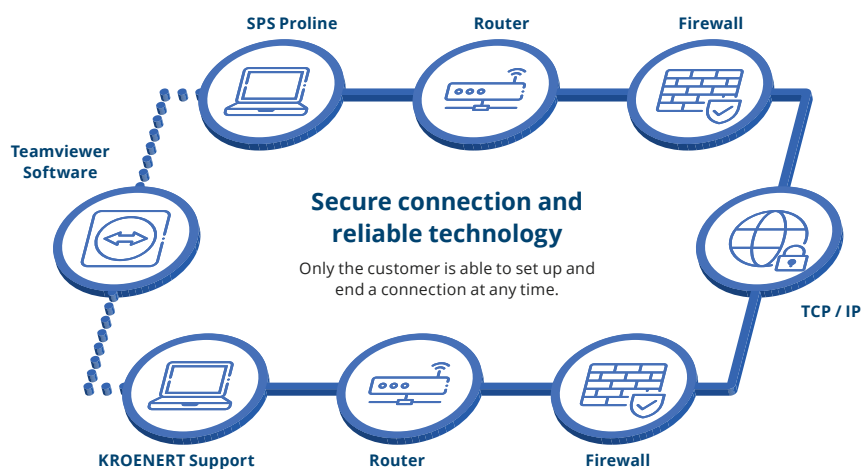

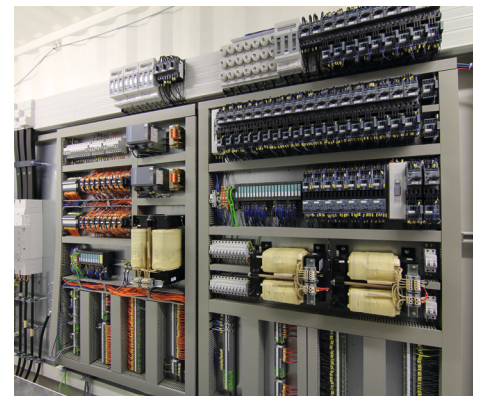

### Fault diagnosis and rectification without the need to travel.

When it comes to troubleshooting your KROENERT system online, you can use our reliable remote service. Your benefits: fast fault analysis through direct access to your machine's control system and reducing on-site times and the associated costs.

**Good to know:** We can offer you special cost benefits within the framework of a remote service contract

#### Your benefits:

- Troubleshooting thanks to online access
- Reduce deployment and repair costs
- Increase machine availability
- Cost advantages in connection with a remote service contract

✓ Online access

✓ Fast responsive time

✓ Increased machine availability
