

MCO 5000

Possible applications

PSA labels and silicones Clear on clear labels

Laminated packaging

Adhesive tapes

The modular extendable **COATING AND LAMINATING MACHINE**

MCO 5000

Innovative solutions and tailor made machines are the key drivers for our worldwide success. Following this path, we added the MCO 5000 to complete our product portfolio, the first modular configured and extendable coating and laminating machine designed to grow with your business.

With its flexible and new design concept, the MCO 5000 meets todays and tomorrows market requirements:

- Modularity: easily extendable at a later stage and adaptable to the growing needs
- Flexibility: one multipurpose coating head for various coating methods
- Time to market: short delivery and installation/ commissioning times
- Easy Operation: simple and powerful to maximize machine usability thanks to well proven solutions
- Sustainability: optimized energy consumption using high efficiency motors
- World Wide Servicing: by remote access and standardized spare parts ensuring quick response time

Coating processes

Coating processes

With the modular concept of the MCO 5000 coating line, a variety of coating processes can be achieved easily and also, if required, added at a later stage. The following coating methods are as standard available, they are executed as fixed multi-purpose coating unit:

- Gravure roller coating with non-pressurized doctor chamber T
- Grayure roller coating with pressurized doctor chamber MPG 600 CI
- 3 smooth roller coating head with pan
- 5 smooth roller coating head nip fed
- Slot die coating
- Other coating methods upon request

Coating methods

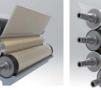

Coating media

Whether 100 % solid systems, solvent based or water based media (e. g. silicones), pressure sensitive adhesives, lacquers, primers, the MCO 5000 offers a wide range of possibilities.

Our proven technology assures highest coating weight accuracy as well as repeatability and easy handling.

Applications (among others)

- Siliconised materials
- Label stock (i. e. PSA labels)
- Adhesive tapes (water based)
- Lacquered products
- Primered paper/film products

3 roller pan fed 5 roller nip fed

Machine Configuration

Unwind/Rewind module

- Turret un- and rewind
- Automatic splicing
- Splicing at full production speed
- Both direction splicing
- Integrated dancer for tension control

Coating station module

- Universal station for gravure and smooth roller coating, slot die coating
- Operation in forward or reverse mode (roller coating)
- · Pneumatic adjustment of rollers
- Sleeve type backing roller

Additional services

- Turnkev Installation
- Class room and practical training of operating personnel
- Maintenance contract

Vacuum pull station

Edge guiding station

Corona treater

- Universal module
- Pull station Web cleaner
- Flexo printing station
- Dry laminating station
 Cooling station
- Conditioning station
 Dancer Roller
- Rehumidification station, e. g. Steamtec 0.5/1.0

Dryer module

- Length of each dryer section: 5.000 mm
- · Air floatation nozzles
- Heating systems by gas or thermal oil
- Variable nozzle configurations
- · Alternatively used as air cooling section
- 24/7 emergency service
- Remote diagnostics (Teleline)
